FORM NOTES FOR FORM 2

In some cases, the Department of Health Services uses estimates to prepare budgeted amounts for this application process. This is due partly to the fact that the State budget has not been enacted and could alter the numbers reflected in Form 2. And a significant portion of the funding reflected in Form 2 is based upon caseload estimates which could increase or decrease during the year.

FORM NOTES FOR FORM 3

In some cases, the Department of Health Services uses estimates to assess expenditures for both individuals served and the types of services provided. These estimates are based on the target population and program activities established by legislative authorization and specified in the scope of work for each contractor or local government program. Requiring contractors to bill according to actual amounts spent on each type of individual served and by service provided is impossible within the current administrative and fiscal policies. Changing our contractual or program policies would result in undue financial and administrative hardship to local governments and non-profit community-based organizations that are already stretched very thin financially. This added burden without increased funding would result in many of them not being able to continue to provide needed services to women and children in the state.

Source: State of California, Department of Health Services, Center for Health Statistics, 2003 California Birth Statistical Master File. Tabulations (by place of residence) done by Maternal and Child Health Branch. Both "Expected Source of Payment for Delivery" and prenatal care coverage were used to determine "Primary Source of Coverage" for pregnant women. A woman who had Medi-Cal coverage for either prenatal care or delivery was considered covered by Title XIX. Codes are as follows: (B) Title XIX=Medi-Cal (02), [and Medi-Cal CPS(13) for prenatal care variable], (C) Title XXI=no codes used, (D) Private/Other= all payment source codes except those used in (B) and (E), and (E) None=self pay (09), No charge (10), Medically Indigent (12), Unknown payment source (99), and Medically Unattended / no prenatal care(00). Some of the payment source codes used for (D) might include some persons for whom health coverage was actually "none" but could not be separated from "covered" persons within the pertinent codes.

Estimate of women delivering in California based on the number of live births reported, including those served in programs funded by the MCAH/OFP Branch. This figure includes an estimated 38,535 pregnant women served in MCAH/OFP programs: 12,763 in the Adolescent Family Life Program (AFLP), 5,431 in the Black Infant Health Program (BIH) and 20,341 women served by the California Diabetes and Pregnancy Program (CDAPP) (AFLP data from CY 2004, CDAPP and BIH data for CY 2003). Medi-Cal eligibility for maternity and infant services was up to 200% FPL. Healthy Families Program (HFP) eligibility was raised from 200% FPL to 250% FPL in November 1999. All women who had Medi-Cal coverage for prenatal care and/or delivery services are included under Title XIX. Prior to 2000 data, only women with Medi-Cal delivery coverage were included.

FORM NOTES FOR FORM 8

"Title V deliveries served" includes an estimated 12,763 in the Adolescent Family Life Program (CY 2004), an estimated 5,431 in the Black Infant Health Program (CY 2003), and an estimated 20,341 served by the California Diabetes and Pregnancy Program (CY 2003). "Title V infants served" includes an estimated 7,074 (CY 2004) infants in the Adolescent Family Life Program and 1,822 (CY 2003) in the Black Infant Health Program.

For the number of Total deliveries, Title V deliveries, Total infants and Title V infants, the number of 2003 live births (by place of residence) was used as an estimate. For the number of "Deliveries Eligible for XIX" and "Infants Eligible for XIX" a subset of 2003 live births was used as an estimate (subset of all live births for which "expected source of payment for delivery" = Medi-Cal by place of residence). Race and Hispanic origin of mother were used for Section I and II respectively. Column D includes American Indian, Eskimo, and Aleutian. Column E includes Chinese, Japanese, Korean, Vietnamese, Cambodian, Thai, Laotian, Hmong, Asian Indian, Filipino, Asian-specified, and Asian-unspecified. Column F includes Hawaiian, Samoan, Guamanian, and other Pacific Islander.

Data Source: State of California, Department of Health Services, Center for Health Statistics, 2003 California Birth Statistical Master File. Data by race/ethnicity were analyzed using mother's multi-race code. Tabulations were done by the Maternal, Child, and Adolescent Health/Office of Family Planning Branch.

TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2006
[SEC. 506(A)(1)]
STATE: CA

1. State MCH Administration:
(max 2500 characters)

Title V funds are administered by the Maternal, Child and Adolescent/Office of Family Planning (MCAH/OFP) Branch and the Children's Medical Services (CMS) Branch in the State of California. These two Branches are part of the Primary Care and Family Health Division which also includes WIC, the Genetic Disease Branch, and Primary Care and Rural Health Systems Branch (including Native American Health). The MCAH/OFP Branch conducts statewide assessment of needs, develops policies, plans and programs to improve the health of women, infants, adolescents, and families in California utilizing the core public health functions. The CMS Branch is responsible for the Child Health and Disability Prevention Program (CHDP), California Children's Services (CCS) program, and the Genetically Handicapped Persons Program (GHPP). CCS is the Children with Special Health Care Needs program.

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

Black Infant Health Program: Programs located in 17 local jurisdictions address community-based causes of Black infant mortality and low birthweight. Serves more than 14,400 Black women, infants, children and their families annually. Adolescent Family Life Program: AFLP provides case management for over 17,600 pregnant and parenting teens and their partners to prevent/reduce second pregnancies, improve pregnancy outcomes, and strengthen parenting skills. Domestic Violence Program: FY 05/06 is the beginning of the first year of a five-year grant cycle and consolidation of the shelter, prevention, and unserved/underserved (UU) grants. All 94 shelters will receive Shelter, Prevention and U/U funding. The two technical assistance training support contracts will continue. California Children's Services and Genetically Handicapped Persons Program: CCS case manages the eligible condition for children in CCS and GHPP. Case management and specialty referral ensure that children with complex health and psycho-social needs have access to multi-disciplinary, coordinated evaluation and treatment from specialists in tertiary Pediatric Special Care Centers.

b. Population-Based Services:
(max 2500 characters)

Sudden Infant Death Syndrome (SIDS) Program: Coordinates SIDS services through data collection and analysis, support services to families and child care providers, education and training for parents, coroners, nurses, first responders and child care providers, conducts the Back to Sleep campaign. Breastfeeding Strategic Plan defines specific activities to be carried out by the MCAH/OFP and CMS Branches in coordination with MCAH programs like AFLP and BIH and State and local agencies such as WIC. Childhood Injury Prevention Program: promotes public awareness of the preventable nature of injuries, develops coalitions at the local, State, and regional levels, and provides technical assistance to State and local programs. Birth Defects Monitoring Program: Collects and analyzes data on children with birth defects. Newborn Genetic Screening and Expanded Alpha Fetoprotein Programs: Screens for congenital primary hypothyroidism, galactosemia, phenylketonuria, and sickle cell disease and other hemoglobinopathies. Offers prenatal screening to detect neural tube defects and other fetal abnormalities. Newborn Hearing Screening Program: A statewide hearing screening program for all infants born in CCS-approved hospitals has been implemented.

c. Infrastructure Building Services:
(max 2500 characters)

Local MCAH Programs: The MCAH/OFP Branch contracts with 58 counties and 3 city health jurisdictions to support the infrastructure at local health departments to promote the health and well being of all women of childbearing age, infants, children, and adolescents. Services include a toll-free telephone system; perinatal outreach and education; perinatal provider networks; monitoring and public education on children's issues, including injury and family violence prevention, and data collection. Fetal Infant Mortality Review Program: There are 17 FIMR projects that cover 17 counties in California where communities have set up a standardized infant death review system to identify, evaluate, and determine potential factors that contribute to preventable infant death. Development of CMS Net: The CMS Branch continues implementation of an integrated statewide data system, CMS Net. This case management system is allowing tracking of health services and outcomes for CSHCN, monitoring quality standards, and providing a basis for policy development. Linkage of this system with other State data systems is in progress and will improve management and epidemiologic capabilities.

Numerator: A five percent sample of unduplicated counts of Medi-Cal recipients ages 20 and under during October 2001 through September 2002 was used to estimate the number of clients that received a service. This estimate may not include all Medi-Cal managed care data because, at the time of the run, the tape may not have included all managed care reports. Denominator: Medical Care Statistics Section special run to estimate the monthly average number of Medi-Cal enrollees aged 20 and under during October 2001 through September 2002. The number of children eligible but not enrolled in Medi-Cal was obtained from a report from the UCLA Center for Health Policy Research, Health Policy Fact Sheet: "Number of Uninsured Californians Declines to 6.2 million" (March, 2002) that used data from the 2001 Current Population Survey. This was the same estimate used last year because no new estimate was available this year. The denominator was the total of the estimated number of enrollees plus the estimated number of eligible but not enrolled in Medi-Cal.

This measure is the percent of children whose family income is less than 200 percent of the Federal Poverty Level (FPL) who received at least one CHDP health assessment during the reporting year.

Source: CHDP program data and California census data.

Numerator is the number of children up to age 21 years who received at least one health assessment, as documented on the CHDP billing and reporting PM 160 Form for FY 2001-2002.

Denominator is the number of children up to age 21 years whose family income is less than 200 % of FPL for FY 2001-2002.

This measure as scored does not include health assessments given through the Healthy Families program, since this data is not yet available. Also Medi-Cal Managed Care plans are not consistently completing the PM 160 form, as this is an "information only" form for the plans.

The percent refers to the percent of women in the survey who were 18 years or older and reported intimate partner physical abuse in the past 12 months, weighted to the 1990 census data. Some forms of physical abuse were condensed from separate questions in 1999 to a single question in 2000, 2001 and 2003. Data from 2003 are presented for both 2002 and 2003 because the questions used in 2002 were not comparable to those used in other years. Also, rates of intimate partner violence were recalculated for all past years. In this recalculation, the denominator was redefined to exclude all respondents who either refused to answer or had missing data for all intimate partner violence questions. Tabulations were done by the MCAH/OFP Branch.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: CA FY: 2006

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Enhance preconception care and work toward eliminating disparities in infant and maternal morbidity and mortality.
2. Promote healthy lifestyle practices among MCAH populations and reduce the rate of overweight children and adolescents.
3. Promote responsible sexual behavior in order to decrease the rate of teenage pregnancy and sexually transmitted infections.
4. Improve mental health and decrease substance abuse among children, adolescents, and pregnant or parenting women.
5. Coordinate to develop and implement a system of timely referral between mental health, developmental services, social services, special education services and CCS.
6. Improve access to medical and dental services, including the reduction of disparities.
7. Expand the number of qualified providers participating in the CCS program, e.g., medical specialists, audiologists, occupational and physical therapists, and nutritionists.
8. Increase the number of family-centered medical homes for CSHCN and the number/percent of CCS children who have a designated medical home.
9. Decrease unintentional and intentional injuries and violence, including family and intimate partner violence.
10. Increase breastfeeding initiation and duration.

STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: CA

SP # 1

PERFORMANCE MEASURE:

The percent of children whose family income is less than 200 percent of the Federal Poverty Level who received at least one preventive medical exam during the fiscal year.

STATUS:

Active

GOAL

All low-income children will have a primary care provider to meet their preventive, acute, and chronic health care needs.

DEFINITION

Numerator:

Number of children who have received at least one preventive medical examination as measured by the Child Health & Disability Prevention Program health assessment exam (PM 160 data) .

Denominator:

Number of children whose family income is less than 200 percent of the federal poverty level.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

California census data, CHDP/PM 160 form data. The necessary data are not available from Healthy Families.

SIGNIFICANCE

Annual preventive health examinations are an ideal method for the recognition and early intervention of all medical problems. Most children without health coverage come from low-income families and, as a result, receive health examinations at a significantly lower rate than children of higher economic levels. Annual health examinations allow for treatment and referral of acute and chronic health care needs and provide for early identification of CSHCN. CMS coordinates and implements cooperative agreements at the state and local level for information, referral, and assistance for families to enroll in programs such as Medi-Cal, Healthy Families, and WIC to improve access to primary care services for children included in this Performance Measure.

SP # 2

PERFORMANCE MEASURE:

The percent of low-income children who are above the 95th percentile of weight-for-length (less than 2 years) or BMI-for-age (2-12 years), or overweight.

STATUS:

Active

GOAL

To reduce the prevalence of overweight among California's youth through the adoption of healthier lifestyle practices.

DEFINITION

The percent of low-income children who are above the 95th percentile of weight-for-length (less than 2 years) or BMI-for-age (2-12 years), or overweight.

Numerator:

Number of children age 0-12 years served in the Child Health and Disability Prevention program with a weight-for-length (less than 2 years) or a BMI-for-age (2-12 years) above the 95th percentile.

Denominator:

The number of children age 0-12 years in the Child Health and Disability Prevention program with a weight and length/height measurement indicated on the PM160 form.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Pediatric Nutrition Surveillance System, Centers for Disease Control and Prevention. Beginning with FY 2001, data have been updated to utilize the 2000 CDC growth chart percentiles and CDC has unduplicated the data.

SIGNIFICANCE

California's concern with pediatric overweight is related to the association of childhood weight problems with adult overweight and obesity, and the increased risk of a number of chronic diseases, such as high blood pressure, Type II diabetes, stroke, and heart disease. In addition, childhood overweight serves as a sentinel event for broader issues of unhealthy lifestyle practices.

SP # 3

PERFORMANCE MEASURE:

The rate of deaths per 100,000 children aged 1 through 4 years caused by drowning in swimming pools.

STATUS:

Active

GOAL

To reduce the rate of drowning deaths of children aged 1 through 4 years caused by drowning in swimming pools.

DEFINITION

Numerator:

Number of deaths to children aged 1 through 4 years caused by drowning in swimming pools. This excludes drowning in bathtubs, buckets, and natural bodies of water.

Denominator:

All children in the State aged 1 through 4 years.

Units: 100000 **Text:** rate per hundred thousand

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

ICD10 codes used for the numerator are W67 and W68. California Department of Finance for denominator data.

SIGNIFICANCE

Drowning is a leading cause of injury death to toddlers and preschool-age children (ages 1 through 4 years) in California and has been for the last decade. In 1994, 74 (3.1 per 100,000) children aged 1-4 years drowned in swimming pools and 305 (13.0 per 100,000) were victims of near-drowning. The majority of drowning deaths (approximately 60%) in this age group occur in residential swimming pools.

SP # 4

PERFORMANCE MEASURE:

The rate of deaths per 100,000 adolescents aged 15 through 19 years caused by homicide.

STATUS:

Active

GOAL

To reduce the rate of deaths to adolescents aged 15 through 19 years caused by homicide.

DEFINITION

The rate of deaths per 100,000 adolescents aged 15 through 19 years caused by homicide.

Numerator:

Number of deaths to adolescents aged 15-19 years caused by homicide.

Denominator:

All adolescents in the State aged 15-19 years.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital Statistics Death Records for numerator data. California Department of Finance for denominator data.

SIGNIFICANCE

Homicide is a leading cause of death for California children and adolescents. In addition, it serves as a sentinel event in the wider problem of adolescent violence in the State. In California, in 1996, 691 children less than 19 years of age died from homicide. Seventy-five percent (n=521) of these homicides were to victims aged 15-19 years old for a homicide rate of 24.7 per 100,000. With 20.5 deaths for every 100 hospitalizations, attempted homicide is three times more lethal than all other injuries in California (1994 data). In 1994, gunshots caused 90 percent of the homicides among youths aged 16-20 years.

SP # <u>5</u>	
PERFORMANCE MEASURE:	The rate of deaths per 100,000 adolescents aged 15 through 19 years caused by motor vehicle injuries.
STATUS:	Active
GOAL	To reduce the number and rate of deaths to adolescents aged 15 through 19 years caused by motor vehicle injuries.
DEFINITION	<p>Numerator: Number of deaths to adolescents aged 15-19 years caused by motor vehicle injuries.</p> <p>Denominator: All adolescents in the State aged 15-19 years.</p> <p>Units: 100000 Text: rate per hundred thousand</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Vital Statistics Death Records for numerator data. California Department of Finance for denominator data.
SIGNIFICANCE	Motor vehicle injuries are the second leading cause of death for California adolescents. In California, in 1996, 666 youths aged 19 years and under died from motor vehicle injuries. The mortality rate for adolescents is approximately five times greater than for younger children, with 59 percent (n=395) of the motor vehicle deaths among children aged 19 and under occurring to victims aged 15-19 years. The motor vehicle death rate was 18.7 per 100,000 for youths aged 15-19 in 1996.

SP # 6

PERFORMANCE MEASURE:

The incidence of neural tube defects (NTDs) per 10,000 live births plus fetal deaths among counties participating in the California Birth Defects Monitoring System.

STATUS:

Active

GOAL

To reduce the incidence of NTDs in California.

DEFINITION

Numerator:

Number of NTDs among fetal deaths and live births in counties monitored by the California Birth Defects Monitoring System.

Denominator:

All fetal deaths plus live births in monitored counties.

Units: 10000 **Text:** rate per ten thousand

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

California Birth Defects Monitoring Program Registry Data. The incidence of NTDs in monitored counties is believed to be representative of the State's diverse population.

SIGNIFICANCE

There are two types of neural tube defects: spina bifida (open spinal cord) which causes lifelong physical disabilities and anencephaly (absence of the brain) which leads to infant death. The risk for NTDs is 50 percent greater in Latinos than among Caucasians. In addition, infants born to Mexican-born mothers have 1.7 times the risk of these defects compared to infants born to U.S.-born mothers.

SP # 7

PERFORMANCE MEASURE:

The percent of California Children's Services (CCS) enrolled children registered in CMS Net, the statewide automated case management and data collection system for CCS.

STATUS:

Active

GOAL

To have CCS statewide computer system that captures data on all of the CCS enrolled children.

DEFINITION

The percent of California Children's Services (CCS) enrolled children registered in CMS Net, the statewide automated case management and data collection system for CCS.

Numerator:

The number of CCS enrolled children who are entered in CMS Net.

Denominator:

The total number of CCS enrolled children.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The data will be collected through CMS Net and CCS program files.

SIGNIFICANCE

The CCS program is run as a state-county partnership. The CMS Net data collection, analysis, and monitoring system will be used to track health service provision, health outcomes, monitor quality standards, and provide a basis for health policy development for CSHCN. Currently 52 of 58 counties are entering data into the CMS Net.

SP # 8

PERFORMANCE MEASURE:

The percent of women 18 years or older reporting intimate partner physical abuse in the past 12 months.

STATUS:

Active

GOAL

To reduce the prevalence of domestic violence against women.

DEFINITION

Numerator:

Numerator: Number of women in the Ca. Women's Health Survey who report any of the following: having been pushed, had objects thrown at her, was slapped, was hit with an object, was kicked or hit, was choked, was beaten up or was threatened with a gun or knife by an intimate partner in the past 12 months, weighted according to the most recent available Census data.

Denominator:

Denominator: Number of women surveyed, weighted to the most recent available Census data.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

California Women's Health Survey, California Department of Health Services. U.S. Census data for California, California Department of Finance.

SIGNIFICANCE

Domestic violence is the leading cause of injury to women ages 15-44 in the U.S. Annually, about 30% of murdered women are killed by their intimates. In California, 196,832 incidents of domestic violence were reported to law enforcement, and 56,892 domestic violence arrests were made in 1998.

SP # 9

PERFORMANCE MEASURE:
STATUS:
GOAL
DEFINITION

The percent of youth aged 12-17 years who report smoking cigarettes in the past 30 days.

Active

To reduce the number of youth who smoke tobacco products.

Numerator:
Number of youth 12-17 years of age in California who report having smoked cigarettes in the past 30 days.

Denominator:
Number of youth 12-17 years of age. Survey data are weighted to be representative of the age group in the State.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

State of California, Department of Health Services, Cancer Control Branch, Tobacco Control Section, California Tobacco Control Update, August 2000.

SIGNIFICANCE

Tobacco is the number one preventable cause of death in the U.S. More than 80% of adult smokers had tried smoking by their 18th birthday, and more than half had become regular smokers by that time. Of the almost 3,000 young people who become regular smokers each day in the U.S., nearly 1,000 of them will have their lives shortened from tobacco-related diseases.

SO # 1

OUTCOME MEASURE:

The maternal mortality rate per 100,000 live births.

STATUS:

Active

GOAL

To reduce the rate of maternal deaths.

DEFINITION

Numerator:

Number of deaths to mothers caused by complications of pregnancy. Group cause of death codes with Group number 261 - 273 were used.

Denominator:

Number of live births.

Units: 100000 **Text:** Rate per one hundred thousand

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital records collected by the State of California.

SIGNIFICANCE

Maternal mortality serves as a sentinel event, and as such, serves as a good indicator of maternal health care and prenatal care for women, especially minorities. African-American women, in particular, have a disproportionately high rate of maternal mortality. Maternal mortality rates in California continue to fluctuate annually, but have not shown major improvements since the mid-1970s.

Tabulations were done by the MCAH/OFP Branch.
Rates for the years 2000-2002 may have changed from those reported in last year's report because they have been recalculated based upon updated population projections from the California Department of Finance. The new projections are based on the 2000 Census while data from previous reports were based on population projections from the 1990 Census.

Denominator is the unduplicated number of children under one year of age enrolled in Medi-Cal in FY 2002-2003. The methodology for the denominator was changed to be more inclusive for FY 2001-02. The same methodology was applied to data for FY 1999-00 and FY 2000-01, resulting in annual indicators of 66 and 70.8 respectively.

Denominator is the revised HCFA-416 Form element number 12a for FY 2003-04.
Medical Care Statistics has been providing the numerator and denominator for this performance measure the past few years, but for FY 2003-04, the numerator and denominator were provided by Medstat using the Management Information System/Decision Support System (MIS/DSS) data base. The numerator for the measure was similar to 2002-03, but the denominator was much larger, most likely secondary to using different aid codes in determining the EPSDT eligible children. The performance measure for 2003-04 cannot be compared with prior years.

Year: 2002
Field Note:
This measure is the percent of SSI beneficiaries through age 15 years receiving rehabilitative services through the CCS program. Source of data for the numerator is from CMS Net and CCS program data and for the denominator is from the publication: Social Security Administration Office of Policy, Children Receiving SSI.
Numerator: Children under 21 years of age enrolled in CCS with aid codes of 20 and 60 for FY 2002. Since active cases on CMS Net represent an estimated 41.6 percent of all active CCS cases for CA for FY 2002, the number with aid codes 20 and 60 from CMS Net is extrapolated for CA. Note that the CMS Net system has not had the capability of identifying children through 15 years, so these are children through 20 years. Also there are other disability aid codes but the numbers would be very small, and there may be some children with aid codes 20 and 60 not receiving rehabilitative services, but again this number would be very small.
Denominator: Data from the publication: Social Security Administration Office of Policy, Children Receiving SSI for December 2002 for California.
Note: The methodology for this measure has changed for FY 2002. The numerator previously was children in the CCS program who had at least one rehabilitative service resulting in a claim paid by the Medi-Cal program. This results in an over approximation, since not all of these children have SSI. The numerator for FY 2002 is the number of children in the CMS Net system with aid codes of 20 or 60 (disabled children with SSI). This number is extrapolated for all counties. This number is considered a closer approximation to the number of CSHCN with SSI receiving rehabilitative services.
The denominator has changed as well. The denominator previously was the unduplicated count of Medi-Cal enrolled children age 15 and under with aid codes 20 and 60. This number is larger than the number published by the Social Security Administration Office of Policy, Children Receiving SSI. This latter reference for December 2002, however, contains the number of SSI beneficiaries under 16 years for California, and is the recommended reference for this Title V measure. Therefore, the denominator has been changed to reflect this number.

Numerator: Children under 21 years of age enrolled in CCS with aid codes of 20 and 60 (disabled children with SSI) for FY 2003-04. Since active cases on CMS Net represent an estimated 50.5 percent of all active CCS cases for CA for FY 2003, the number with aid codes 20 and 60 from CMS Net is extrapolated for CA. Note that the CMS Net system has not had the capability of identifying children through 15 years, so these are children through 20 years. Also there are other disability aid codes but the

This is the number of SSI beneficiaries under 18 years for California.

This measure is the percent of SSI beneficiaries through age 15 years receiving rehabilitative services through the CCS program. Source of data for the numerator is from CMS Net and CCS program data and for the denominator is from the publication: Social Security Administration Office of Policy, Children Receiving SSI.

Numerator: Children under 16 years of age enrolled in CCS with aid codes of 20 and 60 (disabled children with SSI) for FY 2003-04. Since active cases on CMS Net represent an estimated 55.1 percent of all active CCS cases for CA for FY 2003, the number with aid codes 20 and 60 from CMS Net is extrapolated for CA. Note that the CMS Net system now has the capability of identifying children through 15 years.

The denominator is from the Social Security Administration Office of Policy, Children Receiving SSI for December, the midpoint of the current fiscal year, for children under 16 years of age.

This is the first year that data have been available for children less than 16 years of age, so no comparative data for previous years are available.

NEW STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: CA

SP # 1

PERFORMANCE MEASURE:

The percent of children whose family income is less than 200 percent of the Federal Poverty Level who received at least one preventive medical exam during the fiscal year.

GOAL

All low-income children will have a primary care provider to meet their preventive, acute, and chronic health care needs.

DEFINITION

Numerator:

Number of children who have received at least one preventive medical examination as measured by the Child Health & Disability Prevention Program health assessment exam (PM 160 data) .

Denominator:

Number of children whose family income is less than 200 percent of the federal poverty level.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

California census data, CHDP/PM 160 form data. The necessary data are not available from Healthy Families.

SIGNIFICANCE

Annual preventive health examinations are an ideal method for the recognition and early intervention of all medical problems. Most children without health coverage come from low-income families and, as a result, receive health examinations at a significantly lower rate than children of higher economic levels. Annual health examinations allow for treatment and referral of acute and chronic health care needs and provide for early identification of CSHCN. CMS coordinates and implements cooperative agreements at the state and local level for information, referral, and assistance for families to enroll in programs such as Medi-Cal, Healthy Families, and WIC to improve access to primary care services for children included in this Performance Measure.

OBJECTIVE

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 2

PERFORMANCE MEASURE:

The percent of low-income children who are above the 95th percentile of weight-for-length (less than 2 years) or BMI-for-age (2-12 years), or overweight.

GOAL

To reduce the prevalence of overweight among California's youth through the adoption of healthier lifestyle practices.

DEFINITION

Numerator:

Number of children age 0-12 years served in the Child Health and Disability Prevention program with a weight-for-length (less than 2 years) or a BMI-for-age (2-12 years) above the 95th percentile.

Denominator:

The number of children age 0-12 years in the Child Health and Disability Prevention program with a weight and length/height measurement indicated on the PM160 form.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Pediatric Nutrition Surveillance System, Centers for Disease Control and Prevention. Beginning with FY 2001, data have been updated to utilize the 2000 CDC growth chart percentiles and CDC has unduplicated the data.

SIGNIFICANCE

California's concern with pediatric overweight is related to the association of childhood weight problems with adult overweight and obesity, and the increased risk of a number of chronic diseases, such as high blood pressure, Type II diabetes, stroke, and heart disease. In addition, childhood overweight serves as a sentinel event for broader issues of unhealthy lifestyle practices.

OBJECTIVE

SP # 3

PERFORMANCE MEASURE:

The rate of deaths per 100,000 children aged 1 through 4 years caused by drowning in swimming pools.

GOAL

To reduce the rate of drowning deaths of children aged 1 through 4 years caused by drowning in swimming pools.

DEFINITION

Numerator:

Number of deaths to children aged 1 through 4 years caused by drowning in swimming pools. This excludes drowning in bathtubs, buckets, and natural bodies of water.

Denominator:

All children in the State aged 1 through 4 years.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

ICD10 codes used for the numerator are W67 and W68. California Department of Finance for denominator data.

SIGNIFICANCE

Drowning is a leading cause of injury death to toddlers and preschool-age children (ages 1 through 4 years) in California and has been for the last decade. In 1994, 74 (3.1 per 100,000) children aged 1-4 years drowned in swimming pools and 305 (13.0 per 100,000) were victims of near-drowning. The majority of drowning deaths (approximately 60%) in this age group occur in residential swimming pools.

SP # 4

PERFORMANCE MEASURE:

The rate of deaths per 100,000 adolescents aged 15 through 19 years caused by homicide.

GOAL

To reduce the rate of deaths to adolescents aged 15 through 19 years caused by homicide.

DEFINITION

Numerator:

Number of deaths to adolescents aged 15-19 years caused by homicide.

Denominator:

All adolescents in the State aged 15-19 years.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital Statistics Death Records for numerator data. California Department of Finance for denominator data.

SIGNIFICANCE

Homicide is a leading cause of death for California children and adolescents. In addition, it serves as a sentinel event in the wider problem of adolescent violence in the State. In California, in 1996, 691 children less than 19 years of age died from homicide. Seventy-five percent (n=521) of these homicides were to victims aged 15-19 years old for a homicide rate of 24.7 per 100,000. With 20.5 deaths for every 100 hospitalizations, attempted homicide is three times more lethal than all other injuries in California (1994 data). In 1994, gunshots caused 90 percent of the homicides among youths aged 16-20 years.

SP # 5

PERFORMANCE MEASURE:

The rate of deaths per 100,000 adolescents aged 15 through 19 years caused by motor vehicle injuries.

GOAL

To reduce the number and rate of deaths to adolescents aged 15 through 19 years caused by motor vehicle injuries.

DEFINITION

Numerator:

Number of deaths to adolescents aged 15-19 years caused by motor vehicle injuries.

Denominator:

All adolescents in the State aged 15-19 years.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital Statistics Death Records for numerator data. California Department of Finance for denominator data.

SIGNIFICANCE

Motor vehicle injuries are the second leading cause of death for California adolescents. In California, in 1996, 666 youths aged 19 years and under died from motor vehicle injuries. The mortality rate for adolescents is approximately five times greater than for younger children, with 59 percent (n=395) of the motor vehicle deaths among children aged 19 and under occurring to victims aged 15-19 years. The motor vehicle death rate was 18.7 per 100,000 for youths aged 15-19 in 1996.

SP # 6

PERFORMANCE MEASURE:

The incidence of neural tube defects (NTDs) per 10,000 live births plus fetal deaths among counties participating in the California Birth Defects Monitoring System.

GOAL

To reduce the incidence of NTDs in California.

DEFINITION

Numerator:

Number of NTDs among fetal deaths and live births in counties monitored by the California Birth Defects Monitoring System.

Denominator:

All fetal deaths plus live births in monitored counties.

Units: 10000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

California Birth Defects Monitoring Program Registry Data. The incidence of NTDs in monitored counties is believed to be representative of the State's diverse population.

SIGNIFICANCE

There are two types of neural tube defects: spina bifida (open spinal cord) which causes lifelong physical disabilities and anencephaly (absence of the brain) which leads to infant death. The risk for NTDs is 50 percent greater in Latinos than among Caucasians. In addition, infants born to Mexican-born mothers have 1.7 times the risk of these defects compared to infants born to U.S.-born mothers.

SP # 7

PERFORMANCE MEASURE:

The percent of California Children's Services (CCS) enrolled children registered in CMS Net, the statewide automated case management and data collection system for CCS.

GOAL

To have CCS statewide computer system that captures data on all of the CCS enrolled children.

DEFINITION

Numerator:

The number of CCS enrolled children who are entered in CMS Net.

Denominator:

The total number of CCS enrolled children.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The data will be collected through CMS Net and CCS program files.

SIGNIFICANCE

The CCS program is run as a state-county partnership. The CMS Net data collection, analysis, and monitoring system will be used to track health service provision, health outcomes, monitor quality standards, and provide a basis for health policy development for CSHCN. Currently 52 of 58 counties are entering data into the CMS Net.

SP # 8

PERFORMANCE MEASURE:

The percent of women 18 years or older reporting intimate partner physical abuse in the past 12 months.

GOAL

To reduce the prevalence of domestic violence against women.

DEFINITION

Numerator:

Numerator: Number of women in the Ca. Women's Health Survey who report any of the following: having been pushed, had objects thrown at her, was slapped, was hit with an object, was kicked or hit, was choked, was beaten up or was threatened with a gun or knife by an intimate partner in the past 12 months, weighted according to the most recent available Census data.

Denominator:

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

California Women's Health Survey, California Department of Health Services. U.S. Census data for California, California Department of Finance.

SIGNIFICANCE

Domestic violence is the leading cause of injury to women ages 15-44 in the U.S. Annually, about 30% of murdered women are killed by their intimates. In California, 196,832 incidents of domestic violence were reported to law enforcement, and 56,892 domestic violence arrests were made in 1998.

SP # 9

PERFORMANCE MEASURE:

The percent of youth aged 12-17 years who report smoking cigarettes in the past 30 days.

GOAL

To reduce the number of youth who smoke tobacco products.

DEFINITION

Numerator:

Number of youth 12-17 years of age in California who report having smoked cigarettes in the past 30 days.

Denominator:

Number of youth 12-17 years of age. Survey data are weighted to be representative of the age group in the State.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

State of California, Department of Health Services, Cancer Control Branch, Tobacco Control Section, California Tobacco Control Update, August 2000.

SIGNIFICANCE

Tobacco is the number one preventable cause of death in the U.S. More than 80% of adult smokers had tried smoking by their 18th birthday, and more than half had become regular smokers by that time. Of the almost 3,000 young people who become regular smokers each day in the U.S., nearly 1,000 of them will have their lives shortened from tobacco-related diseases.
